

247274

Public Service Commission of SC

Docket No. 2013-201-WS

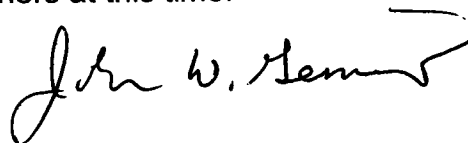

To Whom It May Concern:

In regard to the rate increase requested, the increase is exorbitant and does not seem reasonable based on the observed activity in the Shandon development. The numbers quoted are not representative of normal usage. We are a two retired person house and do not try to water the lawn so water usage is not high. Based on the requested rate increase our August bill would increase from \$88 to \$132 or 50%. While I accept that some increase may be warranted, this does not seem justified.

I hope you will consider the impact on home owners at this time.

Thanks,

John W. Genier
